

Conveyancing Calculator

Increase efficiency and convert more enquiries.

Helping firms become more efficient, transparent and responsive.

Mozaïque Conveyancing Calculator is a part of the Mozaïque ecosystem. It's a quoting tool that allows law firms to generate, display, and manage online quotes for clients & prospects seeking conveyancing services.

It removes the complexity of large, extensive, cumbersome systems that are difficult to use and costly to maintain. Mozaïque's popularity is based upon taking the essential tools that firms require in an easy to use, cost effective way.

The most important element of the system is that it is integrated deeply with your Practice and Case Management System to maximise efficiency. The Calculator helps firms become more efficient, transparent, and responsive during the early stages of a potential client's journey.

Benefits

Easy to deploy and fully branded

Mozaïque's conveyancing calculator transforms the way law firms generate and manage quotes. Easy to deploy and fully branded to your firm, it sits on a secure subdomain (e.g. conveyancing.yourlawfirm.com) and delivers instant, compliant quotes to potential clients; anytime, anywhere, on any device.

No more manual email quotes

No more staff manually producing and emailing quotes. With just a few clicks, clients get the clarity they need, while your team gains back valuable time. Quotes feed directly into your PCMS via our unique Holding Bay technology where they can be checked, refined, and submitted seamlessly. This eliminates duplication and re-keying.

The result?

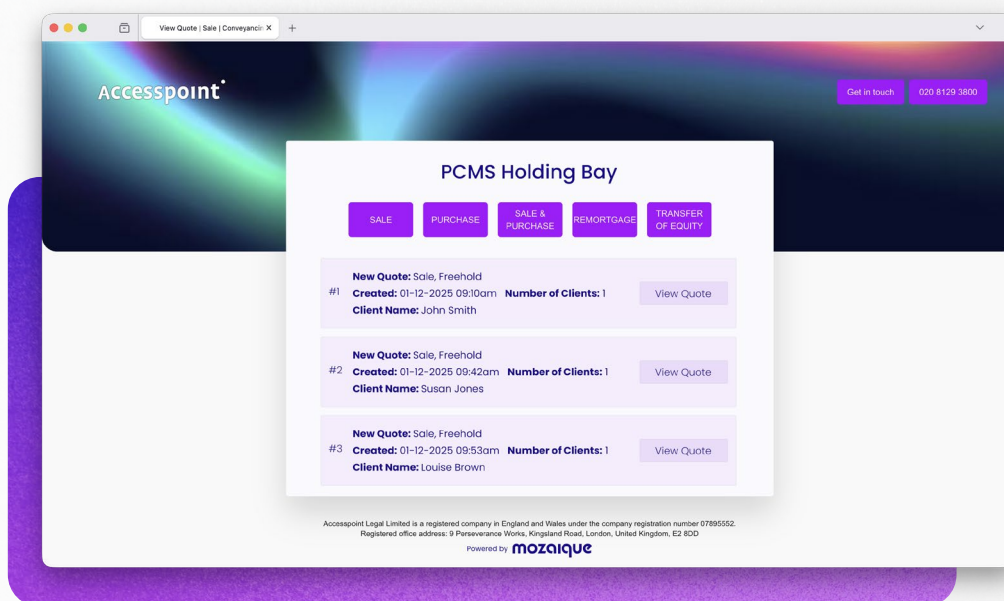

Faster response times, higher conversion rates, and complete transparency for your clients. You can track enquiries, set follow-up reminders and capture every lead without leaving Case Manager. Plus, our built-in analytics give you insight into quote sources, conversion trends and pricing performance, which helps you continually optimise your approach

With Mozaïque, quoting isn't just quicker...it's smarter. You'll boost efficiency, strengthen client trust, and win more business with less effort.

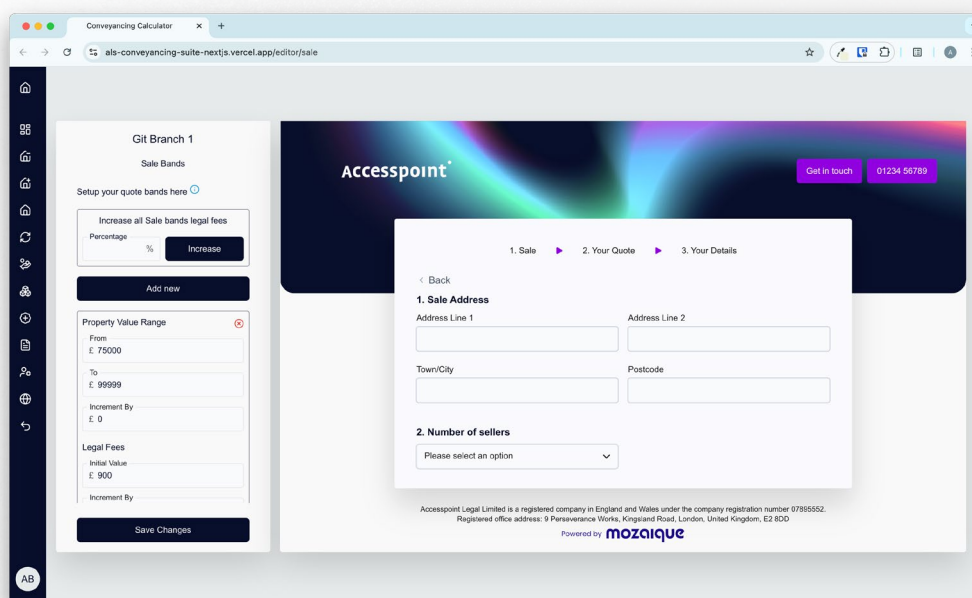

PCMS Integration

Seamlessly connected to your Practice and Case Management System, the calculator sends every completed quote directly into your PCMS via our Holding Bay. Your conveyancing team can review, duplicate-check, edit, and convert enquiries into Clients & Matters without any re-keying.

Customisable Services, Fees & Prices

Easily tailor your quoting structure with fully configurable services, fee scales, add-ons, and third-party fees. Adjust prices individually or globally at any time, ensuring your quotes remain accurate, consistent, and aligned with your firm's internal pricing without reliance on development expertise.

Instant Self-Served Quotes

Visitors can generate their own personalised conveyancing quote instantly through your website. No waiting, no manual calculations, and no need for staff involvement. Clients get immediate clarity, and your team gains back valuable time.

Customisable PDF Quote

Each quote automatically generates a fully branded PDF that reflects your firm's identity. You can append or prepend additional documents — such as welcome letters, terms, or policies, creating a complete and professional client pack.

Customisable Design

Make the calculator fully your own with your firm's branding. Upload logos, apply your colour palette, and include required legal information such as your privacy policy, Company Registration Number, and SRA ID. This ensures a consistent and trustworthy client experience.

Configurable Services

Choose exactly which conveyancing services you want to offer including sale, purchase, sale & purchase, remortgage, and transfer of equity. Each option can be enabled or disabled.

Multiple Branches

This tool accommodates firms with multiple branches directly within the tool. These are easy to maintain and edit via the admin interface.

GDPR Compliant, No Data Stored

We never store client data. Information is passed securely between systems in real time, keeping your firm fully GDPR compliant and your clients' details protected.

Secure, Email-Free Data Handling

Instead of relying on email, we use secure API webhooks to transfer data directly between systems. This reduces risk, eliminates exposure, and ensures all information is handled safely.

Compliant with SRA Pricing Transparency

The system supports the legal obligations around pricing transparency, showing fees and required information in a compliant manner.

Easy Platform Management

Take full control with an intuitive admin panel that lets your team manage services, pricing, branches, and branding in seconds — all without technical know-how.

Built for Every Device

Our platform is fully responsive, ensuring a smooth, consistent experience on mobiles, tablets, and desktops. Every interaction remains fast, intuitive, and easy to use.

Easy to Deploy and Adopt Internally

The Calculator tool is extremely easy to use, maintain and rollout firmwide with minimal effort. You can immediately start benefitting from streamlined quotes.

Security at the Core

Our platform is engineered with security at its core. Built on modern, resilient infrastructure, it provides a trusted environment for handling sensitive client and case information.
